The Morning Breakdown

Our story begins on a typical Friday morning. Adekunle, an insightful young man with a penchant for trying new technologies, found his Toyota Corolla sputtering to a halt at a busy intersection. Mechanical issues were the last thing he wanted to deal with on a day packed with meetings and errands. Nevertheless, his pressing schedule steered him toward the nearest car repair shop in his neighborhood.

The mechanic, Chidi, greeted Adekunle with a warm smile, assuring him that his car would be back in working condition in no time.

As they reviewed the repair costs and payment options, Chidi subtly mentioned, "We accept YEM here." Adekunle's eyes lit up. Here was a perfect opportunity to use his YEM Benchmark Coins for a transaction outside his usual realm of online shopping and services.
